Jerry,

The Parliament problem is resolved. What I spoke to you about the other day was the true problem. The number that was on the CRI server files that you had for "All Glasses" was overstated and the total on our tapes from CRI was understated. The problem had actually occurred in the first 3 weeks of the program, so the numbers since then have been correct. I have enclosed the corrected update with data through 1/14/98. Next week, the tapes should be correct.
